

CURLINFO\_SPEED\_DOWNLOAD(3)      curl\_easy\_getinfo options      CURLINFO\_SPEED\_DOWNLOAD(3)

## NAME

CURLINFO\_SPEED\_DOWNLOAD – get download speed

## SYNOPSIS

```
#include <curl/curl.h>
```

```
CURLcode curl_easy_getinfo(CURL *handle, CURLINFO_SPEED_DOWNLOAD, double *speed);
```

## DESCRIPTION

Pass a pointer to a double to receive the average download speed that curl measured for the complete download. Measured in bytes/second.

## PROTOCOLS

## EXAMPLE

TODO

## AVAILABILITY

Added in 7.4.1

## RETURN VALUE

Returns CURLE\_OK if the option is supported, and CURLE\_UNKNOWN\_OPTION if not.

## SEE ALSO
